

# DevNet Overview

2.1.1

## What is DevNet?

DevNet is a fully-integrated developer program comprising a website, an interactive developer community, coordinated developer tools, integrated discussion forums, and sandboxes. Whether you are new to coding and networking, or you have advanced skills, there are opportunities to learn more through such features as:

- **Learning Labs** - Self-paced tutorials that cover a wide range of topics; starting from basic coding to using REST APIs with various technologies
- **Sandboxes** - Production-like development and testing environments for a host of technologies
- **Code Exchange** - A repository of sample code written by other developers
- **Developer support** - Support for developer related issues through tickets, live chats, and forums
- **Developer documentation** - A central location for all of the product developer (API) documentation

These are additional resources that are available to you but are not required for completion of this course.

- **Video courses** - Instructor led videos that teach various topics including hands-on exercises
- **DevNet events** - Events around the world where you can find DevNet's developers teaching classes on a variety of topics and giving hands-on workshops.
